

AWARDED CONTRACT

New York State Office of General Services

EV Charging Solutions Made by New Yorkers, for New Yorkers

Livingston Energy Group, a Lynkwell company, has been awarded a New York State Office of General Services (OGS) statewide procurement contract for public, private and fleet electric vehicle (EV) charging infrastructure. The company, one of four contractors awarded and the only one based in New York State, can now offer its Buy America-compliant electric vehicle charging equipment, software, and monitoring and maintenance services to state public purchasing entities through a streamlined procurement process.

Group 40404 - Electric Vehicle Supply Equipment and Network Services

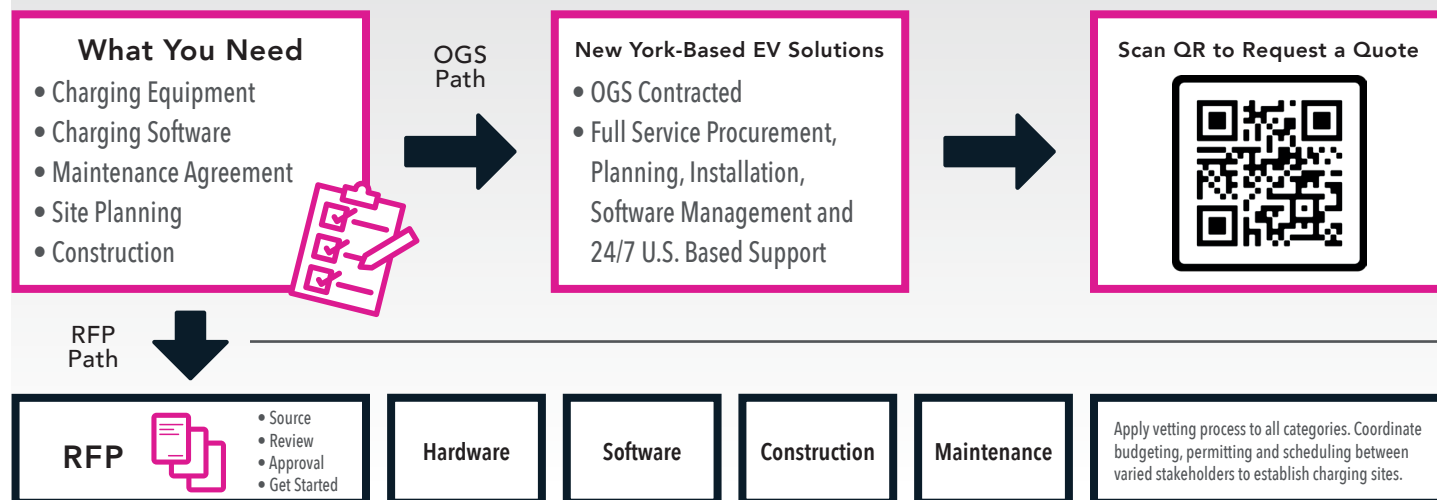

OGS CONTRACT: PC70332

Federal ID: 812078028

NYS Vendor ID: 1100193955

Accepts Procurement Card for orders up to \$50,000.00

EV Charging Equipment Procurement Paths

The streamlined solicitation process offered through the OGS contract award will save staff time and related expenses throughout the procurement process, save state funds through volume-driven cost reductions, and ensure quality and compliance through pre-vetting conducted by the state.

Delivering Power Nationwide

Operating the second-largest network of EV chargers in New York State and a top-10 ranking network nationwide, Livingston Energy Group attributes its industry-leading reliability and uptime as foundational to its success. The company's full vertical integration ensures effective deployment and ongoing support beyond infrastructure deployment, prioritizing customer satisfaction.

Livingston Energy Group and Lynkwell are Grateful for its Many Supporters

“As New York State continues to deliver transformational funding for advancements in clean transportation, it's critical to ensure that New York-based businesses reap the benefits of these investments. With that in mind, I'm thrilled to see Schenectady's own Livingston Energy Group awarded this OGS contract to develop EV charging infrastructure across New York State. This award underscores the importance of investing in local companies like Livingston that operate at the forefront of sustainable infrastructure development. I'm proud of my efforts at the federal level to bolster EV infrastructure here in New York and across the nation, and I look forward to continuing to work alongside our local partners to ensure a greener future for all.”

Representative
Paul Tonko
of New York's 20th Congressional District

“As a member of the New York State Assembly's Energy Committee, I'm pleased to see Livingston Energy Group, based in Schenectady, awarded a state contract for electric vehicle charging infrastructure. Known for their extensive charger network and successful track record, this partnership not only brings much-needed high-tech jobs to our community but also lays the groundwork for a more sustainable future. Livingston Energy Group's leadership in this effort is commendable, and I'm proud to support their work.”

Assemblymember
Angelo Santabarbara
of New York's 111th Assembly District

“The announcement of Schenectady-based Livingston Energy Group as the sole NY-based provider of EV charging station hardware and software is great news for the economy of the 44th Senate District and for the state's efforts to expand our alternative fuel options.”

Senator
Jim Tedisco
of New York's 44th Senate District

About Livingston Energy Group and Lynkwell

Livingston Energy Group, a Lynkwell company, is a full deployment electric vehicle charging solutions provider. Ranked as one of the fastest-growing private companies in the United States the last two years in a row and among the top 10 networked providers of electric vehicle chargers in the country, Livingston Energy Group and Lynkwell have close to 10,000 charging stations active and in development on its cloud-based software platform, which hosts dozens of EV charging networks. With an extensive catalog boasting more than 500 cutting-edge products, the companies offer a diverse range of commercial Level 2 and Level 3 (DCFC) charging equipment alongside industry-leading software solutions. Since 2016, the companies have been instrumental in establishing private and public charging solutions to support America's growing electric fleet.
